## Dataset metadata

This dataset provides 2011 Census estimates that classify household spaces in England and Wales by accommodation type and by household space occupancy. The estimates are as at census day, 27 March 2011.

### Statistical Disclosure Control

In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected. In the main, the greatest effects will be at the lowest geographies, since the record swapping is targeted towards those households with unusual characteristics in small areas.

More details on the ONS Census disclosure control strategy may be found on the [Statistical Disclosure Control](#) page on the ONS web site.

## Household Spaces

### Household space

A household space is the accommodation used or available for use by an individual household. Household spaces are identified separately in census results as those with at least one usual resident, and those that do not have any usual residents.

A household space with no usual residents may still be used by short-term residents, visitors who were present on census night, or a combination of short-term residents and visitors.

Vacant household spaces and household spaces that are used as second addresses are also classified in census results as household spaces with no usual residents.

The following Household Spaces are available:

- | All categories: Household spaces
- | Household spaces with at least one usual resident
- | Household spaces with no usual residents
